DETAILED ACTION

Drawings

The drawings were received on 2 May 2006. These drawings are approved.

Information Disclosure Statement

A signed, completed IDS accompanies this office action.

Specification

The disclosure is objected to because of the following informality:

The Specification should be updated to show that the instant application is a divisional of 09/959,945 now US 6,764,662 B1.

Appropriate correction is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting

Art Unit: 3643

ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 13, 14, 16-18, and 20-22 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,764,562 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because both claim claims a pyrotechnic gas-generating composition consisting of GUDN and an oxidizer to provide excess oxygen. For claim 13, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the claim/invention of by adding a metal fuel since it is well known in the explosives art to use metal fuels. Additionally, for the dependent claims it would have obvious to add these limitations to the composition of US 6,764,562 B1 depending upon use of the composition.

Examiner considers the double patenting of at least claim 13 in the instant application to be proper because claim 1 of US 6,764,562 B1 is considered to be generic for the species requirement even though the instant application is a divisional of 09/959,945.

Allowable Subject Matter

Upon entry of a proper terminal disclaimer, claims 13, 14, 16-18, and 20-22 are allowed over the art of record.
